

Beazer Homes Receives ENERGY STAR® Certified Homes Market Leader Award

June 17, 2019

ATLANTA – June 17, 2019 – Beazer Homes has been awarded the ENERGY STAR® Certified Homes Market Leader Award for its 100% commitment to ENERGY STAR® in 2019. ENERGY STAR® certified homes are at least 10% more energy efficient than homes built to code and achieve a 20% improvement on average, while providing homeowners with better quality, performance, and comfort. By making this commitment, Beazer has earned special EPA recognition.

Beazer Homes designs and builds each home to provide more quality, more comfort, and more savings from the moment you move in. We call it Surprising Performance—the result of experienced people, industry-leading processes, and high-caliber materials coming together to build high-performing, energy efficient homes that save customers money every month.

“We see the 100% ENERGY STAR® commitment as the real mark of leadership among American home builders,” said Jonathan Passe, Chief of the ENERGY STAR® Residential Branch. “It’s a commitment to excellence in terms of lower utility bills, greater home comfort, and environmental protection.” Homes earning the ENERGY STAR® label are designed and built to standards well above most other homes on the market today. When ENERGY STAR®’s rigorous requirements are applied to new home construction, the result is a home built better from the ground up, delivering better durability, better comfort, and reduced utility and maintenance costs. Features of an ENERGY STAR® certified home include:

- A Complete Thermal Enclosure System — Comprehensive air sealing, properly installed insulation, and high-performance windows work together to enhance comfort, improve durability, reduce maintenance costs, and lower monthly utility bills.
- A Complete Heating and Cooling System — High-efficiency systems that are engineered and installed to deliver more comfort, better moisture control, improved indoor air quality, and quieter operation.
- A Complete Water Management System — A comprehensive package of best building practices and materials protects roofs, walls and foundations from water damage, provides added protection, and reduces the risk of indoor air quality problems.
- Energy-Efficient Lighting and Appliances — ENERGY STAR® qualified lighting, appliances, and fans are commonly installed throughout ENERGY STAR® certified homes, helping to reduce monthly utility bills, while providing high-quality performance.

About Beazer Homes

Headquartered in Atlanta, Beazer Homes (NYSE: BZH) is one of the country’s largest homebuilders. Every Beazer home is designed and built to provide Surprising Performance, giving you more quality and more comfort from the moment you move in – saving you money every month. With Beazer’s Choice Plans™, you can personalize your primary living areas – giving you a choice of how you want to live in the home, at no additional cost. And unlike most national homebuilders, we empower our customers to shop and compare loan options. Our Mortgage Choice program gives you the resources to easily compare multiple loan offers and choose the best lender and loan offer for you, which will save you thousands over the life of your loan.

We build our homes in Arizona, California, Delaware, Florida, Georgia, Indiana, Maryland, Nevada, North Carolina, South Carolina, Tennessee, Texas, and Virginia. For more information, visit beazer.com, or check out Beazer on [Facebook](#), [Instagram](#) and [Twitter](#).

About ENERGY STAR

ENERGY STAR® is the simple choice for energy efficiency. For over 25 years, EPA’s ENERGY STAR® program has been America’s resource for saving energy and protecting the environment. Join the millions already making a difference at energystar.gov. More background information about ENERGY STAR® can be found at energystar.gov/about and energystar.gov/numbers.

Thousands of industrial, commercial, utility, state, and local organizations—including more than 40 percent of the Fortune 500®—rely on their partnership with the U.S. Environmental Protection Agency (EPA) to deliver cost-saving energy efficiency solutions. Together, since 1992, ENERGY STAR® and its partners have helped save American families and businesses over \$450 billion and over 3.5 trillion kilowatt-hours of electricity while also achieving broad emissions reductions—all through voluntary action.
