Beazer Homes Launches Energy Series Homes in San Antonio Area Communities

August 9, 2023

SAN ANTONIO – August 9, 2023 – Beazer Homes is excited to announce the launch of its Energy Series READY Homes in several new San Antonio area communities. The most energy-efficient homes built by Beazer today, Energy Series READY homes are so energy efficient that all or most of their annual energy consumption can be offset with renewable energy. Each Energy Series READY home built in these new communities will be certified by the U.S. Department of Energy as a Zero Energy Ready Home™.

The first model home built to Beazer's Energy Series READY standards can now be toured at Veranda. Beazer's Morgan Meadows, Parklands Estates and Hunter's Ranch communities are also currently selling READY homes, with models slated to open this year.

"Every home we build is designed with cutting edge, energy-efficient features," said John Friesenhahn, San Antonio division president for Beazer Homes. "Our commitment to the Zero Energy Ready Home program means so much more than just superior energy efficiency and utility bill savings. Building practices like air sealing, insulation and ventilation processes go a long way here in San Antonio. We've thought through every detail to build a home that is comfortable and durable. Right-sized air conditioning units not only condition the air, but control humidity which is a must in a hot, humid climate like ours. The attics are even cool enough to keep our chocolate Easter bunny from melting!"

For more than 25 years, Beazer has been a leader in building homes ahead of current standards and beyond expectations. Beazer was the first U.S. national homebuilder to publicly commit that by the end of 2025, every single-family home built will meet the requirements of the U.S. Department of Energy's (DOE) Zero Energy Ready Home program. The program incorporates building science innovations and practices to achieve at least 40%-50% greater energy efficiency than a typical new home. DOE Zero Energy Ready Homes are verified and certified by a qualified third-party inspector.

Additionally, Beazer's Energy Series READY homes are ENERGY STAR® certified and Indoor airPLUS® qualified by the U.S. Environmental Protection Agency (EPA). Behind the walls of each Beazer home are innovative, energy-efficient features to improve home performance and maintain ideal temperatures, giving homeowners control over their comfort. Each home is designed to filter indoor air, which reduces pollutants like mold and toxic chemicals. This means healthier living with improved air quality and comfort.
