

BEAZER HOMES

Beazer Homes Set to Open Newest Energy Efficient Community, Cascade Landing

April 2, 2025

RICHMOND, Va. – Beazer Homes, the nation's leading energy-efficient builder*, is excited to introduce its newest community, Cascade Landing, in Dumfries, Va. The neighborhood will be comprised of 152 townhomes, each built to the U.S. Department of Energy's Zero Energy Ready Home standards.

Homebuyers and real estate agents are invited to celebrate the grand opening of [Cascade Landing](#) on Saturday, April 12 from 11 a.m. to 6 p.m. Attendees will enjoy a first look at the new model homes, view available lots, savor wood-fired pizza, and be entered into a raffle for a grill or fire pit.

Cascade Landing will feature three-story townhomes ranging from 1,934 to 2,198 sq. ft. with 3 to 4 bedrooms and 2.5 to 3.5 bathrooms, and 1 or 2-car garages. The community is also located within easy access to Quantico, local shops, and dining.

"At Beazer Homes, we prioritize innovative, energy efficient designs in every home we build," said Gary Szebalskie, division president for Beazer Homes in Virginia. "Our high-performance homes help homeowners save on energy costs, enjoy healthier indoor air quality, and experience greater overall comfort. We are excited to be building the home of the future - reducing our environmental impact while enhancing the way people live."

For more than 30 years, Beazer has been a leader in building homes ahead of current standards and beyond expectations. Beazer was the first U.S. national homebuilder to publicly commit that by the end of 2025, every single-family home built will meet the requirements of the U.S. Department of Energy's (DOE) Zero Energy Ready Home program. According to the DOE, the program incorporates building science innovations and practices to achieve at least 40-50% greater energy efficiency than a typical new home. DOE Zero Energy Ready Homes are verified and certified by a qualified third-party inspector.

Additionally, Cascade Landing homes will be ENERGY STAR® certified and Indoor AirPlus® qualified by the U.S. Environmental Protection Agency (EPA). Behind the walls of each Beazer home are innovative, energy-efficient features to improve home performance and maintain ideal temperatures, giving homeowners control over their comfort. Each home is designed to filter indoor air, which reduces outside pollutants like mold and toxic chemicals. This means healthier living with improved air quality and comfort.
