The exact stock prices and effective dates may not be set forth in the table above, in which case:

- if the applicable stock price is between two stock prices in the table or the effective date is between two effective dates in the table, the fundamental change early settlement rate will be determined by straight line interpolation between the fundamental change early settlement rates set forth for the higher and lower stock prices and the two effective dates, as applicable, based on a 365-day year;
- if the applicable stock price is in excess of \$25.00 per share (subject to adjustment), then the fundamental change early settlement rate will be the minimum settlement rate; or
- if the applicable stock price is less than \$1.00 per share (subject to adjustment), the “minimum stock price,” the fundamental change early settlement rate will be determined as if the stock price equaled the minimum stock price, and using straight line interpolation, as described in the first bullet of this paragraph, if the effective date is between two dates in the table.

The maximum number of shares of Common Stock deliverable under a Purchase Contract is 4.3029, subject to adjustment in the same manner as the fixed settlement rates as set forth in the preliminary prospectus under “Description of the Purchase Contracts—Adjustments to the Fixed Settlement Rates.”
